## **Post-Vaccination COVID guidance Existing Precautions Remain in Place**

As the COVID vaccine becomes more available to more people, we wanted to take a few minutes to update you on how the vaccine may impact COVID related precautions and guidelines that are in place for services and general operations.

Although the Centers for Disease Control (CDC) has begun issuing new guidance for fully vaccinated adults, DDRC has not received updated guidance from our oversight agencies at the State of Colorado. While they assess the information from CDC and issue updated guidance for us, we will keep in place all of the existing precautions and guidelines we currently use, including the use of masks, enhanced cleaning and disinfecting, physical distancing and occupancy limits in all of our building and vehicles.

We will continue to follow the guidelines and precautions required by the State and will update you as those change.
